TITLE	Resources for Development. Appropriate Technologies for Development. Manual M-3A.
INSTITUTION	Peace Corps, Washington, DC. Information Collection and Exchange Div.
SPONS AGENCY	Peace Corps, Washington, D.C.
PUB DATE	Jul 81
CONTRACT	79-043-1029
NOTE	221p.; Based on "Resources for Development Agents," David Tyler, 1977, ICE Manual 3.
PUB TYPE	Reference Materials - Bibliographies (131)
EDRS PRICE	MF01/PC09 Plus Postage.
DESCRIPTORS	Abstracts; Annotated Bibliographies; Community Education; *Community Resources; *Developing Nations; Guidelines; Periodicals; Postsecondary Education; *Public Agencies; *Resource Materials; Rural Areas; *Rural Development; Rural Education; *Voluntary Agencies; Volunteers

ABSTRACT

This manual is designed to provide communities and development workers in the developing world with information about some organizations that provide resources for use in rural developmental efforts. Discussed in the introductory section of the guide are the role of the development worker in Third World nations, types of resources, procedures for designing a project, guidelines for choosing appropriate resources, and basic steps in obtaining resources. The next chapter is an index chart consisting of an alphabetical list of organizations that includes information on the organization's region or country of operation, available resources, and field of activity. The next section is an alphabetical listing of organizations according to the country in which their main office is located. When available, each entry in this section contains information concerning the address, basic functions, selected activities, resources, and significant publications of each organization. Concluding the guide are a selected annotated bibliography on appropriate technology and an annotated list of useful periodicals for development workers. (MN)

This document has been reproduced as received from the person or organization originating it.

Minor changes have been made to improve reproduction quality.

Points of view or opinions stated in this document do not necessarily represent official NIE position or policy.

INFORMATION COLLECTION & EXCHANGE

Peace Corps' Information Collection & Exchange (ICE) was established so that the strategies and technologies developed by Peace Corps Volunteers, their co-workers, and their counterparts could be made available to the wide range of development organizations and individual workers who might find them useful. Training guides, curricula, lesson plans, project reports, manuals and other Peace Corps-generated materials developed in the field are collected and reviewed. Some are reprinted "as is"; others provide a source of field based information for the production of manuals or for research in particular program areas. Materials that you submit to the Information Collection & Exchange thus become part of the Peace Corps' larger contribution to development.

Information about ICE publications and services is available through:

Peace Corps
Information Collection & Exchange
Office of Program Development
806 Connecticut Avenue, N.W.
Washington, D.C. 20526

Add your experience to the ICE Resource Center. Send materials that you've prepared so that we can share them with others working in the development field. Your technical insights serve as the basis for the generation of ICE manuals, reprints and resource packets, and also ensure that ICE is providing the most updated, innovative problem-solving techniques and information available to you and your fellow development workers.

Acknowledgments

This manual is a result of the efforts of many individuals, both within and outside the Peace Corps over the last four years. The basic information provided is from ICE Manual 3, "Resources for Development Agents", by David Tyler, 1977. In addition, many individuals contributed material for inclusion in this expanded edition, and TransCentury and Peace Corps wish to acknowledge their efforts. Listed in alphabetical order, we wish to thank Margot Aronson, Pamela Ball, Marilyn Chakroff, Paul Chakroff, Mary Ernsberger, Donna Frelick, Marian Fuchs-Carsch, Pirie Gall, Steve Joyce, Marilyn Kaufman, Randy Lintz, Francis Luzzatto, Scott Mitchell, Craig Storti, Diana Talbert, Olga Thomas and Cade Ware.

1. Introduction

The aim of this manual is to provide communities and development workers in the developing world with information about some organizations that provide resources--who they are, where they can be found, and how they can be used to support community development projects.

One of the Peace Corps' fundamental assumptions is that development involves a building of capacity and self-reliance. In planning a project, locating the resources necessary to implement it,and carrying it through, members of a community gain the skills necessary to define and meet their own development needs. Learning what resources--human, informational, natural, material, technical and financial--are available to them,and determining those which are appropriate to the situation, will enable community members to create their own responses to the problems they face.

The resources required to meet a community need often can be found within the community itself, but at times the most appropriate resources for solving a problem have to come from outside the community. For example, building materials may have to be purchased from the capital city or technical advice may be available only from a government official at the district headquarters. Obtaining these resources from outside the community may seem contradictory to the principal of self-reliance and indeed there is a real danger of creating dependency whenever outside resources are used. A com-

munity can make the best use of what is available and minimize this danger by casting its resource net first at the local level, then regionally, and, only when resources close by have been exhausted, nationally and internationally.

Development does not take place in a vacuum. A village struggling to find ways to meet its needs for pure water, accessible health care, adequate nutrition, sufficient fuel and comfortable shelter can learn from the successes and failures of other communities which have tackled these problems in the past. Just as the community can draw upon the experience of others and use ideas, processes and technologies developed in previous projects to plan its own project, so that community can become a resource on which others can draw in the future. A community then becomes part of the information network by sharing the experience gained in a project with neighboring villages, the government, sponsoring organizations and other development workers and their communities. Peace Corps' Information Collection and Exchange (ICE) and the other organizations listed in this manual make the information available on a wider basis to others in the developing world.

The Role of the Development Worker

The role and responsibilities of the development worker will vary greatly from community to community, culture to culture and project to project. Just as a development project should evolve from the community's definition of its needs, it follows that the roles of the project participants, including those of the development worker, should evolve in a similar manner. In the early stages of a project, the development worker may be primarily an organizer, at a later stage a technical advisor, and still

later a trainer. Often the development worker's greatest role is that of a facilitator--helping the community recognize the resources that exist within itself and linking the community with the network of resources of which it is a part.

Development workers themselves are resources for their communities. The value of development workers is not only in what they know, but also how much they are willing to listen and apply that knowledge appropriately to help the community reach its goals. The successful development worker must understand that his or her knowledge and skills only represent a potential benefit. Unless they are adapted and applied in a manner consistent with the traditions and value of the community, they will be of little use, and unless they are transferred to members of the community, they will be of only temporary benefit.

Ultimately the most important service the development worker can provide is to impart skills to the members of the community in which he or she works. Examples of these skills include project planning, identification of resources and use of technology. A development project then becomes more than digging a well or building a road; it becomes a process by which the participants become more self-reliant, better able to recognize and use the resources available to them and better able to plan and implement future projects on their own.

Types of Resources

Resources may be classified as human, informational, natural, material, technical or financial. Each of these types of resources is available to some extent in every community.

Human resources are the people who participate in a development project. For the most part the residents of a community constitute the bulk of human resources available to a given project. Traditional village leaders are an important source of organizational skills and support. Village craftsmen, local shop owners, traditional midwives and farmers or fishermen often have valuable skills to offer. All members of the community have ideas, labor or other resources to contribute.

It is important not to overlook any segment of the population. The women, the very young and the very old can make significant contributions. Moreover, as part of the community they should be part of the project and their support is often critical to the success of the project.

People outside the community may also form part of the human resource: extension workers, technical advisers, regional or national government officials, missionaries, representatives of development agencies and others.

Informational resources are the ideas and data contained in books, reports, films, records and other media as well as the experiences of individuals and groups that may be passed by word of mouth. Such resources supplement the skills and abilities of individuals involved in projects and help them to select, develop and use other resources. Local government agencies, research stations and development organizations working in the area often are useful sources of information. Peace Corps ICE and many of the organizations listed in this manual also provide informational resources. The information these groups provide is often drawn from the contributions of communities and development workers in the field.

Natural resources are the physical, chemical and biological features in and around the community. These characteristics of the community's

environment include quantities of sunlight and wind; topographic features such as hills, valleys, flatlands, wetlands, watersheds, lakes, rivers and coastlines; surface water and groundwater; stone, clay and other building materials; minerals and soil; trees and other valuable plants and domestic as well as wild animals.

Many natural resources are, for all practical purposes, non-renewable. That is, once used or destroyed, they will not be replaced by natural processes for hundreds or even millions of years. These include stone and mineral ores, geologic water deposits, topographic features, topsoil, and forests. The community must plan to use these resources over the longest period possible, and must protect them against unwise or unnecessary depletion. If a community loses its topsoil to erosion, for example, it may take hundreds of years to replace each valuable inch.

Renewable natural resources such as water, plants and animals also require careful management or their rate of use can easily exceed their natural rate of recovery. That is, the community must constrain its use of trees, surface water, wild animals and other renewable resources to levels that are sustainable by natural processes.

Material resources are manufactured items such as tools, nails, or construction supplies, that are or can be made in the community using locally available materials. Someone from an industrialized society may overlook certain material resources because of their simplicity. A simple reed mat spread in the sun to dry crops for example, may be more suitable and cost-effective than other types of dryers.

Technical resources are the processes and means by which people make use of resources to accomplish a particular task. In the previous

example, sun-drying is a technology, as is a methane digester or an oxplow.

Any technology should be appropriate to the values and conditions of the community. When evaluating the appropriateness of a technology, the community must take into account the social, cultural and natural environment of the locale as well as the economic and engineering feasibility of the design. A bulldozer might clear a foundation for a school faster than forty men, but who will repair the bulldozer when it breaks down? Who will pay for the fuel to run it? Is it really preferable to employing (and involving) forty men who may gain new construction skills in the project? And what about the hens that won't lay because of the noise, or the inability of soils in the cleared area to support vegetation due to compaction and/or erosion?

A traditional technology that has stood the test of time usually has done so for a reason. This is not to say that new technologies will never be appropriate or an improvement on the old, only that what is more "advanced" or "modern" is not universally applicable. Technologies are not sacrosanct; an appropriate one can be made more appropriate. But it should be remembered that the best technology is the one that will actually work and continue to work in all conditions at the locality over an indefinite period of time.

Financial resources are money in the form of locally-raised funds, cash gifts, personal savings, development bank loans, foundation grants or other funds from donor groups. Of all resources these perhaps present the greatest difficulty. In particular, the risk of creating dependency on outside sources is significant when financial resources are needed.

Without exception, local funding sources should be tapped before

any attempt is made to request funding from outside the community. The likelihood of obtaining financial resources from outside sources is very low. The availability of such funds is limited and the competition is intense. There are usually many more projects than funds available to do them.

Time constraints sometimes make it necessary for a community to request funds far in advance of the time when they will be needed. The application process may be long and involved and the donor may require a lot from the community in terms of scheduling, budgeting and evaluation of the project. Planning to meet these requirements can be a very useful exercise for the community, but the process can be difficult and time-consuming, especially if the community is applying for the first time.

Finally, a community has no control over the circumstances which affect the flow of the outside money. Funds can be cut off at any moment, even after the money has been promised and the project started up. External funds, in short, are a dangerous variable which can just as easily undermine an effort as they can contribute to its success. Such funds should be a project's last resort.

There are often financial resources within the community that can be used. Fundraising activities such as carnivals or community gardens are very useful for generating small amounts of money. However, the possible benefit of these activities should be judged in light of the additional resources--time, energy, people, and skills-they will require, as well as the community involvement they might encourage.

A direct appeal to the community for funds is another possible approach. Success will depend in part on the amount of money needed, the

effectiveness of the appeal, the size and wealth of the community and how much the community wants the project.

Designing a Project

Designing a project is largely a matter of matching available resources to the needs of the community. Effectively marshalling the different types of resources to solve a particular problem requires a well-defined plan. The project design should lay out the course of the project from beginning to end, building in a certain amount of flexibility to allow for changes as the plan is implemented. It should also provide for evaluation, not only at the end of the project, but periodically throughout the process.

The answers to a few basic questions can provide the community with the elements it needs to design a project. The development worker can play a part in framing the questions the community must ask itself before beginning a project:

What problem is the project being designed to address? The more clearly the community is able to define the problem and its causes and consequences, the closer the project will come to solving that problem.

What is the primary objective of the project? Setting realistic, achievable goals is central to the success of a project. Planning a series of smaller projects, each with a limited objective, allows the community to build on past successes. Each objective met creates greater self-confidence and skill to be applied to the next project.

In describing the desired results of the project, it may also be useful to try to predict possible negative effects. For example, an irrigation project may lead to higher rice production, but also increase the incidence of schistosomiasis by providing a hospitable environment for the snail which transmits the disease. These potential negative effects must be weighed against the benefits of the project in deciding whether to go ahead with the idea.

How will this objective be reached? What steps must be taken to achieve the desired results? The project can be broken down into a series of steps or tasks which constitute the essence of the plan. They should be carefully scheduled in a logical sequence and be within the scope of the community's resources.

What resources will be needed to achieve the objective? The resources needed to reach the objective should be listed. What tools and materials will be required? Who will be involved in the project? Generally speaking, it is best to keep the number of outside resources to a minimum and to first engage the interest, cooperation and skills of the people who will benefit from the project. This is true of all types of resources: the more locally-based the better.

How will these resources be used? Identifying a resource is one thing: deciding the best way to use it is another. If the village allocates Resource A to Activity A, will there be any left for critical Activity B? Priorities must be set early so that resources are not depleted before the crucial stages of the project are reached.

How long will it take to complete the project? The timetable of a project is crucial for a number of reasons. The length of the project

will probably affect the cost. The timing will affect the availability of resources, especially those which tend to be seasonal. (It is particularly important to be aware of the restraints on people's time and availability. It is unrealistic to expect the community to provide labor for a construction project during the busy farming season, or to expect a government official to participate in a project meeting on a day's notice.) Adequate time should be allowed for requests for outside funding or information or for ordering certain materials. Ultimately, too, the timetable provides a framework for the completion of intermediate tasks and for evaluating progress.

What are the main obstacles to the project's success? Obstacles should be anticipated in the planning stage of the project and possible ways of overcoming them outlined so that undue delays don't occur at crucial times during the project. There may be legal restrictions on the community's ability to handle money from funding agencies or customs duties to be paid on imports. Contacts with the proper government agencies may take time to establish. Political or economic instability may make it difficult to get materials or support for the project. A long lead time may be required for ordering imported materials or applying for outside funding.

There may be a reluctance to participate in or support the project among some members of the community. Change involves a certain risk for villagers, and what seems like a small risk to a development worker may be a large one for a subsistence farmer. If the project has the support of the majority of the community members, they can help the others overcome this resistence to change.

It is important to remember that there is always more than one

way to achieve any objective. Alternative approaches to the problem the community has identified should be outlined and these questions asked. Once the community has evaluated several possible approaches in light of these questions, its members must determine which project best fits the circumstances. The community's task then becomes first to choose which resources are most appropriate for the particular project and second to devise a plan for obtaining them.

Guidelines for Choosing Appropriate Resources

The availability of a given resources does not mean that it can or should be used on a particular project. A community must often choose from among several available resources those that are most appropriate for a project. Appropriate resources should:

- Bring about greater community involvement in the project. The use of the individual resources of key people in the village will increase community interest and participation in the project.

- Be available locally. Imported materials, outside funding and foreign advisers all can leave dependency in their wake. Using local resources provides the community with a chance to develop its own initiative, increase local participation and build community self-confidence and economic strength. Essential equipment that must be purchased from outside the community should be designed so that it can be repaired locally and replaced easily.

- Use appropriate technology. Projects should maximize the use of locally available technologies and technical skills.

- Be culturally acceptable. Projects should respect and build on the cultural strengths of the community.

- Be ecologically sound. Projects should allow for the long-term sustainable use of resources and should not be detrimental to the natural environment.

Basic Steps in Obtaining Resources

Once the community has decided what resources are needed, it must determine where the resources will come from. It is the community that wants the resources, so it should be the community that asks for them. The development worker can help the community formulate its requests and suggest organizations to contact, but the requests should come from the community. This is part of the process of skill transfer from the development worker to the people he or she works with. If the community members themselves make the request, they will gain experience and form contacts which will be useful to them in the future.

It has been said before that a community should begin by casting its resource net close to home. The more local the sponsorship and backing of the project, the greater the commitment of the backers. The more local the resource, the more likely it is to meet the guidelines of appropriateness set forth earlier. Once local resources have been exhausted, the community can then proceed to more remote sources with a clear idea of what is needed. For example, a community may decide it needs $2,000 to buy cement to line several wells in the village. The community leaders begin by organizing a fundraising dance which yields $250. They

then approach the district council for assistance from the district development fund. They obtain another $250. An appeal to the national community development service yields another $500. When the village leaders finally apply to an international organization for the remainder, their own commitment has been amply demonstrated and they can show that they have exhausted all other possibilities. The international organization then may provide the additional funding.

The checklist which follows outlines the basic steps in obtaining resources and it can be applied to each kind of resource--human, informational, etc.--in turn.

1. What resources are needed? Resources should be listed for each task that must be accomplished to complete the project.

2. When is the resource needed? The timetable outlined for the project earlier will allow the community to line up each resource ahead of time. This is essential if the project is to be completed without delay.

3. Is each resource available locally, regionally, nationally or internationally? Beginning locally, each level should be exhausted before proceeding to the next. The more remote the source of the goods or services, the greater the chances of their being late, costly, inappropriate or addictive.

4. What organizations or individuals can provide the resources at each level? The community members will already be aware of many resource groups and individuals which exist locally. The development worker can often be helpful in identifying less obvious local and outside

organizations and individuals which could provide assistance.

5. How do you obtain the resource? Is an application or personal visit required? Are there legal or other requirements that must be met?

6. Does the project timetable allow enough time to obtain the resource? Some material or financial resources may take time to obtain, and human resources may have limited amounts of time to contribute to the project.

7. Will the resource have to be adapted for the project or the community? Some technological designs may have to be adapted to suit local conditions. Informational resources may have to be translated into local languages.

The resource checklist is the final stage in planning a project. At this point, the development worker has helped the community identify a project design, determined the appropriate resources needed to accomplish it, and outlined how it will go about obtaining these resources. The community is now ready to begin the work of making the project design a reality.

2. A Guide to the Manual

This manual is a working document which includes some of the major organizations involved in self-help efforts in the developing world. It is anticipated that the development worker will be able to tap these organizations for resources during the course of his or her tour. We ask that you inform ICE about organizations active in your area that are either not listed here or are inaccurately portrayed. Additions and revisions from the field are welcome and will be published in the ICE Almanac (a supplement to the Peace Corps Times) bimonthly. Peace Corps libraries and resource centers will be able to update their looseleaf versions of this manual periodically, based on information in the Almanac.

This directory is not a comprehensive document. Further information regarding U.S.-based organizations providing development assistance on a country-specific basis may be found in the Technical Assistance Information Clearing House (TAICH) country report series. The TAICH also publishes listings of organizations by specialized focus, e.g., medicine and public health. Additional sources of information include the National Council for International Health which publishes a directory of U.S.-based agencies involved in international health assistance, and Voluntary Foreign Aid Programs--Report of American Voluntary Agencies Engaged in Overseas Relief and Development, published by the Agency for International Development.

The directory is divided into two sections, the Index Chart and the List of Organizations.

The Index Chart

The Index Chart provides an easy reference list and summary of all the organizations contained in the manual. The Chart enables the user to identify those organizations he or she may be interested in contacting for resources. The Chart is set out in columns as follows:

Column 1-Page: The page listed in this column provides complete information on the organization.

Column 2-Region/Country of Operation: This column identifies the region or country in which the organization operates. Regions of operation are broken down as follows:

Asia
Europe
Latin America and the Caribbean
Middle East, North Africa and the Sahel
North America
Sub-Saharan Africa

Column 3-Name of Organization

Column 4-Resources: The symbol(s) in this column represent the resource(s) this organization has provided in the past--e.g., human, informational, technical and/or financial. See the Resources Key at the bottom of each page of the Index Chart.

Column 5 through 14-Field of Activity: Each of these columns indicates a broad field of activity in which an organization is involved. The following list divides these broad fields into several, narrower activities, each designated by a letter. The letters in an activity column mean the organization works in the narrower field represented by that letter. An "X" in this column means the organization is active in the broad field.

Column 5-Health:

A. Family Health
B. Nutrition Education
C. Delivery of Health Services
D. Health Training
E. Immunization/Communicable Disease Control
F. Disability Treatment/Special Education/Rehabilitation
G. Health Planning/Social Services

Column 6-Agriculture:

A. Agriculture Planning/Farm Management
B. Crop Production
C. Animal Production
D. Food Storage
E. Agriculture Education
F. Integrated Food Production

Column 7-Energy

Column 8-Fisheries

Column 9-Water Supply & Sanitation

A. Wells

B. Water Systems

C. Environmental Sanitation

Column 10-Knowledge & Skills

A. Teacher Training

B. Educational Development/Curriculum

C. Primary

D. Secondary

E. University

F. TEFL

G. Formal Vocational/Technical Education

H. Non-Formal Vocational/Technical Education

Column 11-Economic Development

A. Small Business Development

B. Agricultural Business Development

C. Infrastructure Development

D. Integrated Economic Development

Column 12-Forestry & Natural Resources

A. Resource Survey & Development

B. Village Forestry & Afforestation

C. Soil Conservation & Rehabilitation

D. Park Development & Wildlife Management

Column 13-Community Services & Integrated Development

A. Housing

B. Community Facilities/Construction

C. Youth Development

D. Social Services

Column 14-Appropriate Technology

The List of Organizations

The organizations are arranged by region and then listed alphabetically according to the country where their main office is located. The breakdown of regions is as follows:

Asia
Europe
Latin America and the Caribbean
Middle East, North Africa and the Sahel
North America
Sub-Saharan Africa

When available, each entry contains the following information about an organization:

Name
Address
Type of Organization (government, church, university)
Area of Specialization
Basic Functions
Selected Activities and Resources
Significant Publications
Addresses of Branch or Regional Offices

The List of Organizations contains a number of international organiza-

tions which have regional and local offices in various countries. These organizations (such as CARE, Save the Children Federation, etc.) are listed by the country where their headquarters are located and any local or regional offices may be found under the main heading.

4. List of Organizations

Asia

FIJI

Pacific Women's Resource Centre
Box 534
Suva, Fiji

Project Implementation — Women in development

- Supports women's projects and activities in the Pacific region

INDIA

Centre for Development of Instructional Technology (CENDIT)
3 Birbal Marq
Jangpura Extension
New Delhi, 110014
India

Project Implementation — Educational technology
Education & Training
Information Dissemination

- Prepares multi-media learning packages on population, nutrition, education, and children.
- Provices practical training in film and video tape technologies.
- Assists in planning educational programs and trains staffs in use of facilities and operation of equipment.
- Maintains a data bank of educational technology information.

INDIA

Indian Grain Storage Institute
P.O. Box 10
Hapur
U.P. 245101, India

Governmental

Research & Development
Education & Training
Project Implementation

Grain storage

- Conducts research in the design and development of grain storage bins, various types of handling equipment, and dryers and drying techniques.

- Provides training and consulting services in these areas.

International Crops Research Institute for the Semi-Arid Tropics (ICRISAT)
1-11-256 Begumpet
Hyderabad 500016, A.P.
India

Research & Development
Education & Training
Information Dissemination

Dryland farming

- Conducts research on food crops, soil and water resource management, and other farming systems to increase the size and dependability of the crop yield in dryland farming.

- Sponsors training programs and disseminates research results through a publications program.

National Information Bank of Instructional Technology (NIBIT)
3 Birgal Marg
Jangpura Extension
New Delhi 110 014, India

Information Dissemination

Instructional technology and media

INDIA

- Provides information on films, filmloops, filmstrips, audio tapes, photographs, and other software; film projectors, video tape recorders, lamps, and other supplies and hardware; communication research and resources, staff and equipment/facilities in developing countries.

World Health House
Indraprastha Estate
Ring Road
New Delhi-1, India

- A regional office of the World Health Organization. See page 59 for complete information.

INDONESIA

Indonesia Board for Volunteer Service (BUTSI)
Jalam Halimun 4
P.O. Box 3290
Jakarta, Indonesia

Governmental

Village-Level Development

Village technology unit extension services

- BUTSI recruits Indonesian University graduates to work for two years as village-level cross-sectoral community development volunteers.

- Arranges for volunteers from other countries to work in Indonesia and sends Indonesian volunteers to other countries.

- Created the Village Technology Unit (VTU) to provide technical materials to meet a general need in Indonesian villages.

INDONESIA

Development Technology Center
Institute of Technology
P.O. Box 276
Jalan Ganesha 10
Bandung, Indonesia

University-related

Research & Development — Appropriate technologies for development

- Develops such technologies as a non-electric ice maker, an agricultural product dryer, and a stone cutter for cottage jewelry industries.

Directorate of Building Research/United National Regional Housing Centre (DBR/UNRHC)
Bandung, Indonesia

Public, International

Research & Development — Housing and building

- Seeks to develop appropriate technologies for housing and building.
- Works in such areas as building materials, building components, housing units, and construction.

JAPAN

Japan Overseas Cooperation Volunteers (JOCV)
4-2-24, Hiroo
Shibuna-Ku
Tokyo, Japan

Governmental

Project Implementation — Development assistance

JAPAN

- Provides skilled volunteers for two-year assignments in developing countries.

- Operates in agriculture, forestry, livestock, fisheries, transportation, construction, civil engineering, health, sanitation and education.

- Maintains field offices in Bangladesh, Ethiopia, India, Kenya, Laos, Malawi, Malaysia, Morocco, Nepal, Philippines, Salvador, Tanzania, Western Samoa and Zambia.

PAKISTAN

Appropriate Technology Development Organization (ATDO)
Planning and Development Division
Government of Pakistan
17B Satellite Town, Rawalpindi
Pakistan

Government

Research & Development — Appropriate technology

- Projects include the production of paper pulp from banana plants, the design of simple wool spinning machines, the production of insecticide from tobacco waste, biogas fuel for petrol engines, and the use of windmills for water lifting.

National Instructional Technology Unit
Government of Pakistan
Ministry of Education
Islamabad, Pakistan

Governmental

Research & Development
Project Implementation
Education & Training
Information Dissemination — Instructional technology

PAKISTAN

- Oversees instructional technology programs throughout Pakistan.

- Researches different aspects of the field; arranges seminars, workshops and conferences for demonstration purposes; and trains teachers.

- Produces educational films, filmstrips, slides, books, pamphlets, articles, and programmed instructional materials; and low-cost audio-visual aids and teaching packages for primary school level.

PHILIPPINES

International Center for Living Aquatic Resources Management (ICLARM)
MCC P.O. Box 1501
Makati, Metro Manila
Philippines

International, Non-Profit

Research & Development
Education & Training

Fisheries, aquaculture

- Conducts and stimulates research on all aspects of fisheries and other living aquatic resources to assist peoples of economically developing nations.

- Develops programs to improve fish and aquatic resource production and management.

- Establishes cooperative programs and establishes linkages with existing institutions.

- Areas of assistance are mainly Southeast Asia and the Southwest Pacific.

International Institute of Rural Reconstruction (IIRR)
Silang, Cavite
Philippines

PHILIPPINES

U.S. Office:
1775 Broadway
New York, New York 10010

Private, non-profit

Research & Development
Education & Training
Information Dissemination

Rural development

- Promotes rural development by improving employment, credit, cooperatives, literacy and non-formal education, all aspects of health, and self-government.

- Develops new rural development strategies and approaches through applied research and field work in 89 villages in the Cavite Province. Major projects in family planning and food production.

- Offers graduate-level leadership training to rural development administrators from developing countries. Also trains village leaders and farmers.

- Promotes and helps organize rural reconstruction movements in other developing countries by providing technical and financial assistance.

- Sponsors conferences, seminars, and workshops on IIRR research in rural development in the Philippines.

- Publishes related monographs and reports.

- Affiliated with the following rural reconstruction movements:

  Colombia Rural Reconstruction Movement
  Carrera 13 #1773-59, Ofna 201
  Bogota, Colombia

  Ghana Rural Reconstruction Movement
  P.O. Box 2338
  Accra, Ghana
  Field Office: Yensi Centre
  P.O. Box 14, Mampong, Akwipim, Ghana

PHILIPPINES

Guatemala Rural Reconstruction Movement
11 Calle 8-14, of #43
Ciudad de Guatemala, Zona 1
Guatemala
Field Office: Jalpa

Philippine Rural Reconstruction Movement
978 Romualdez Street, Paco
Manila, Philippines
Field Office, San Leonardo, Nueva Ecija

Thailand Rural Reconstruction Movement
Siam Commercial Bank Building, 2nd Floor
1271 Paholyotin Road
Bangkok 4, Thailand
Field Office: Chainot

International Rice Research Institute (IRRI)
P.O. Box 933
Manila, Philippines

Southeast Asian regional

Research & Development
Education & Training
Information Dissemination

Rice cultivation

- Conducts research and testing through: The Genetic Evaluation and Utilization program, The International Rice Tesing Program, and The International Cropping Systems Network.
- Researches and develops small farm equipment and promotes their local production.
- Offers academic and non-academic training and organizes symposia on technical issues.
- Provides documentation service, and publishes research results, an annual bibliography, and other relevant materials.

PHILIPPINES

Philippine Rural Reconstruction Movement
978 Romualdez Street, Paco
Manila, Philippines
Field Office: San Leonardo, Nueva Ecija

See pages 44 and 45 for complete information.

World Health Organization
Regional Office for the Western Pacific
P.O. Box 2932
12115 Manila, Philippines

See pages 59 and 60 for complete information.

SINGAPORE

Techonet
c/o Singapore Institute of Standards
and Industrial Research (SISIR)
Singapore

Private, non-profit

Research & Development
Information Dissemination
Education & Training

Small industry
extension

- This network promotes the development of small industry through training, technological consulting, and a publications program.

- Publishes a TECHONET newsletter and TECH-BRIEFS, a survey of technical articles prepared by the Technical Information Service of the National Research Council (Canada).

- Network members are:

    1. Hong Kong Productivity Center (HKPC), Hong Kong
    2. Department Perindustrien (DP), Jakarta, Indonesia

SINGAPORE

3. Standards and Industrial Research Institute of Malaysia (SIRIM), Selangor, Malaysia

Vlamingenstratt 5
B-3000 Levven, Belgium

Private, non-profit

Research & Development
Information Dissemination

Appropriate technology solutions to development problems

- Responds to technical inquiries from development workers.
- Emphasizes assistance to rural areas in food, sanitation, construction, transport, mechanization, agriculture, electricity, water supply and soil conservation.
- Established an appropriate technology documentation center.

Tilapia International Association
27 Avenue E. Cambier
Bruxelles, 1030, Belgium

Private, non-profit

Research & Development
Project Implementation

Fisheries

- Funds small training programs for local fish culture extension agents.
- Locates fish culture references in French.
- Has produced Tilapia Culture manual, Fiches Techniques sur la Pisciculture.

FRANCE

Centre d'Etudes et d'Experimentation du Machinisme Agricole Tropical (CEEMAT)
Parc du Touroie
92160 Antary, France

Private, non-profit

Research & Development
Information Dissemination

Agricultural mechanization in the tropics

- Researches and tests animal-drawn agricultural equipment, pest control equipment and other small-power devices.

- Helped to establish mechanization testing centers in Madagascar, Mali, Ivory Coast, and Senegal.

- Publishes a quarterly journal, Machinisme Agricole Tropical, and a series of manuals, one of which is available in English: The Employment of Draught Animals in Agriculture.

Centre International de Recherche sur l'Environment et le Developpement (CIRED)
54, Boulevard Raspail
75270 Paris CEDEX 06 France

University-related

Research & Development
Information Dissemination
Education & Training

Environment, energy and development

- Offers seminars and classes on the environment, energy and development at the university level.

- Undertakes research and consulting projects for local, national and international organizations.

- Publishes a variety of related reports and studies.

- Emphasizes the interrelationships among appropriate technology, environmental planning and economic analysis.

FRANCE

Groupe de Recherche sur les Techniques Rurales
34, rue Drumont d'Urville
75116 Paris, France

Private, non-profit

Research & Development
Information Dissemination

Appropriate technology for rural development

- Researches appropriate technologies for rural development.

- Establishing a network of individuals and organizations interested and involved in rural development.

- Provides research results and other relevant information to development workers and their organizations and agencies.

Organization for Economic Cooperation and Development (OECD)
OECD Development Center
94, rue Chardon Lagache
Paris 16 France

Private, non-profit

Research & Development
Information Dissemination

Economic development

- Operates as a forum for intergovernmental discussions of policies, problems and techniques of economic development.

- Conducts a variety of research projects on development, including the work of its Center for Social Development on the role of women in development.

- Disseminates information in part through a publications program; a free monthly brochure, Activities, Publications, Documents, is available from OECD Publications Center, 1750 Pennsylvania Avenue, N.W., Washington, D.C. 20006.

FRANCE

United Nations Educational, Scientific and Cultural Organization (UNESCO)
Place de Fartenoy
Paris, France

Public, international

Research & Development
Information Dissemination

Education, science and culture

- Helps to advance the mutual knowledge and understanding of peoples through all means of mass communication, promotes popular education and the spread of culture, and encourages the teaching and understanding of science.

- Works in such areas as literacy, human rights, compulsory education, educational, scientific and cultural exchange, the preservation of ancient monuments and historic sites.

ITALY

Caritas Internationalis
16, Piazza San Valisto
00153 Rome, Italy

Church-affiliated

Project Implementation

Relief assistance, literacy, community development, housing, social welfare and related activities

- Promotes the development of National Caritas centers and coordinates other activities which include a wide variety of social development and emergency relief assistance worldwide.

ITALY

Food and Agriculture Organization of the United Nations (FAO)
Via delle Termi de Caracalla
00100 Rome, Italy

Public, international

Informational Dissemination
Project Implementation

Food and agricultural development

- Seeks to "raise levels of nutrition and standards of living...to secure improvements in the efficiency of the production and distribution of all food and agricultural products from farms, forests and fisheries...to better the conditions of country dwellers..."

- Promotes the development of basic soil and water resources, promotes the global exchange of new types of plants, combats epidemics of animal diseases, encourages the development and utilization of sea resources and provides technical assistance in nutrition, food management, soil erosion control, reforestation and irrigation engineering.

- Publishes FAO Books in Print, which lists publications in these categories: agriculture, plant science, animal science, forestry, fisheries, land and water, socio-economics and miscellaneous. Also recommended is the Better Farm series, intended for extension workers. Ceres is a global review of agricultural, economic and social developments. Ideas and Action is a bi-monthly bulletin for the FAO's freedom from hunger campaign.

- Operates in approximately ten countries and maintains four regional offices:

  FAO Regional Office for Africa
  P.O. Box 1628
  Accra, Ghana

  FAO Regional Office for Asia and the Far East
  Maliwan Mansion
  Phra Atit Road
  Bangkok 2, Thailand

ITALY

FAO Regional Office for Latin America
C.P. 743-ZC.00
20000 Rio de Janiero, Brazil

FAO Regional Office for the Near East
P.O. Box 2223
Cairo, Arab Republic of Egypt

THE NETHERLANDS

International Reference Center for Community Water Supply (IRC)
P.O. Box 140
Leidschendam
The Netherlands

Research & Development — Community water supply
Information Dissemination

- Coordinates research and development activities and related information in the water supply field.
- Publishes technical papers on hand pumps, water treatment, plastic pipe and other related topics.
- Provides a technical inquiry service.

Tool Stichting Technische Ontwikkelings Landen
Mauritskade 61a
1092 AD
Amsterdam, The Netherlands

Private

Information Dissemination — Appropriate technology

- Seeks to improve economically weak groups in developing countries by making available to these groups both knowledge and technology adapted to the local social situation.

THE NETHERLANDS

- Has a technical inquiry-response-advice service and answers inquiries on a wide range of subjects through the volunteers of the cooperative groups and the library.

- Organizes an annual seminar for the orientation of volunteers and field workers.

SWITZERLAND

International Labour Organization (ILO)
CH-1211 Geneva 22, Switzerland

Gloucester Road
London, SW 7 40Z
United Kingdom

Private, non-profit

Information & Dissemination
Research & Development

Appropriate technology for health

- Collects and disseminates information on health and technologies.

UNITED KINGDOM

- Hopes to publish a directory of contacts and occasional specialized bibliographies.
- Will assist developing countries to establish similar research and resource centers.
- Develops appropriate responses to technical problems.
- Associated with the Intermediate Technology Development Group.

Conservation Tools and Technology, Ltd.
143 Maple Road
Subiton, Surrey KT6 4BH
United Kingdom

Private

Natural energy systems

Information Dissemination
Sales

- Encourages the development and use of alternative technology using such natural resources as the sun and the wind.
- Sells equipment for these systems.
- Publishes Natural Energy, a quarterly newsletter which lists sources for the purchase of wind generators, solar collectors, turbines, water purifiers and other small-scale technological devices.

Intermediate Technology Development Group Ltd (ITDG)
9 King Street
London WC 2E 8HN
United Kingdom

Private, non-profit

Research & Development

Appropriate technologies for development

UNITED KINGDOM

- Seeks "ways and means of utilizing to the fullest extent the resources available to developing countries through the application of the appropriate technologies."

- Researches existing low-cost and labor-intensive technologies.

- Has established two subsidiary companies: 1) Development Techniques, Ltd., which designs, develops and produces specialized equipment for developing countries, and 2) Intermediate Technology Services, Ltd., which carries out overseas consulting services.

- Performs feasibility studies, supervises projects and evaluates project impact.

- Publishes a quarterly Appropriate Technology, a series of booklets on "agricultural equipment and tools for farmers desgined for local construction" and other publications such as A Manual on Building Construction, Water Treatment and Sanitation, and Information Papers on Building Problems and Projects in Nigeria and Kenya.

International Cooperative Alliance
11 Upper Grosvenor Street
London, WIX 9PA

Funding

86 General development

UNITED KINGDOM

- A funding agency that works with and through a wide variety of local welfare societies, international agencies, and government departments.
- Supports work in agriculture, crafts production, education, food processing, forestry, construction, management, health, small-scale industries, vocational training, water resources, wind power.
- Conducts research and development work in disaster technology.

Salvation Army
Queen Victoria Street
London ECHP HEP
United Kingdom

Church-affiliated — Social-economic welfare

- Provides disaster relief assistance--food, clothing, housing.
- Assists communities to improve the welfare of children, mothers, and the elderly.
- Provides medical, health, and sanitation assistance to poor communities.
- Operates in approximately 82 countries.

Latin America and the Caribbean

BARBADOS

Christian Action for Development in the Caribbean (CADEC)
P.O. Box 616
Bridgetown, Barbados

Church-affiliated

Project Implementation
Education & Training

Energy, agriculture, housing and communications

- Finances various development projects such as solar water heaters, re-introduction of Barbadian arts and crafts, and agricultural cooperatives.
- Established an Appropriate Technology Resource Centre which emphasizes energy, agriculture, and housing.
- Operates information network which publishes a newspaper, airs a radio program, sponsors a training program in communications, and provides multi-media kits and other materials for education about development.
- CADEC is the Development Commission for the Caribbean Conference of Churches. There are five other Caribbean Conference of Christian Programme Centres in Antigua, Curacao, Guyana, Jamaica, and Trinidad.

See pages 44 and 45 for complete information.

COLOMBIA

Center for Economic Development Studies
Universidad de los Andes
Calle 18 con Carrera 1-E
Bogota, Colombia

University-related

Education & Training — Economic development

- Emphasizes the role of appropriate technology in development. Jorge Zapp, chairman of the Department of Mechanical Engineering, has built a low-cost turbine to generate electricity and authored Una Microturbina Modular para Generation de Energia a Nivel Domestico en Regiones Apartadas, available from Publicaciones de las Facultad de Ingenieria, Universidad de Los Andes, Bogota, Columbia.

- Has also produced studies on women, including fertility and the marriage rate.

Centro de Desarrollo Integrado a Investigaciones Tropicales "Las Gaviotas"
Department of Mechanical Engineering
Universidad de Los Andes
Bogota, Colombia

University-related

Research & Development — Appropriate technologies for industry

- The Center is concerned with water resources, power and construction, and has designed a low-cost Mitchell turbine, and water conduits and dams that use plastic tubes and stabilized earth.

COLOMBIA

Fundacion para el Fomento de la Investigacion Cientifica y Tecnologica (FICITEC)
Apartado Aereo 27872
Bogota, Colombia

Private, non-profit

Research & Development

Small business development

- Performs consulting services for small businesses, incorporates appropriate technologies into its solutions and has worked on windmill installation, a bicycle-powered generator, and a continuous dryer for grain.

Centro Internacional de Agricultura Tropical (CIAT)
Apartado Aereo 6713
Cali, Colombia

Private, non-profit

Research & Development
Education & Training
Information Dissemination

Tropical agriculture

- Conducts integrated research in crop (cassava, field beans, rice, maize) and livestock (beef cattle and swine) production as well as analysis and evaluation of small farming systems.

- Trains production specialists, post-graduate in-service and other trainees in various fields.

- Provides consulting services including research and training assistance to programs with similar interests.

- Sponsors seminars, workshops and conferences.

COLOMBIA

Instituto Colombiano Agropecuario (ICA)
Calle 37, No. 8-47 8 piso
Apartado Aereo 7984
Bogota, Colombia

Quasi-governmental

Research & Development
Education & Training
Project Implementation

Rural development

- With approximately 36 cattle research projects the ICA seeks to improve grain production and animal health, and assist in controlling the costs of cattle production.

- In conjunction with the International Development Research Center, Canada, the ICA implements approximately 70 rural development projects, emphasizing health, nutrition, sanitation, housing and education.

- Offers related training and professional development courses, including graudate-level programs.

Futuro para la Ninez
Carrera 52 #50-25
Oficina 616
Medellin, Colombia

Private, non-profit

Project Implementation

Community development

- Promotes community development by emphasizing child welfare.

- Helps selected communities to identify their problems, establish self-help strategies to overcome them, and implement projects using mostly local resources.

- Supports such projects as agricultural terraces, fish ponds, vegetable gardens, rabbit hutches, potable water systems, kindergartens.

Apartado 2753
San Jose, Costa Rica

Private, non-profit

Education & Learning
Project Implementation
Information Dissemination

Development project administration

- Provides education, training and consulting services in human relations, community development, development project management and evaluation and related subjects.

- Has produced a social action study - La Mobilizacion Social.

Food Technology Research Center
Universidad de Costa Rica
San Jose, Costa Rica

University-related

Research & Development

Food processing

- Seeks to develop low-cost food processing techniques with direct local application, and works toward the reduction of post-harvest losses, stabilization of prices, and an increase in available food products.

Instituto Centroamericano de Extension de la Cultura (ICECU)
Ciudad Universitaria
P.O. Box 2948
San Pedro, Costa Rica

University-related

Cultural and education extension

- Produces and disseminates cultural and educational extension materials for underprivileged youths and adults.

COSTA RICA

Inter-American Institute of Agricultural Sciences
(Side Central del IICA)
Apartado 55-2200 Coronado
San Jose, Costa Rica

International

Education & Training — Agriculture
Program Implementation

- Specialized agency of the OAS.

- Promotes economic and social development through graduate teaching, research, technical assistance and communications.

- Directs Project 206, Inter-American Program for Rural Development and Agrarian Reform.

- Maintains field offices in Argentina, Barbados, Bolivia, Brazil, Columbia, Chile, Domincan Republic, Ecuador, El Salvador, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Trinidad and Tobago, United States, Uruguay and Venezuela.

- Publishes Turrialba (quarterly), Cacais (quarterly in Spanish and English), Dasonomia Interamericana (quarterly), Desarrollo Rural en Las Americas (three times a year), Boletin Bibliografico Agricola (quarterly).

Interamerican Center for Documentation and Agricultural Information
Apartado 55-Coronado
San Jose, Costa Rica

Information Dissemination — Agriculture

- Maintains a library containing 60,000 volumes and 2,500 periodicals.

COSTA RICA

Secretaria Interamericana para la Joventud Rural
Apartado 10280
San Jose, Costa Rica

Latin American regional

Project Implementation — Rural youth development

- Affiliated with 4H rural youth programs, SIJR provides rural extension assistance, and assists in the operation of agricultural schools and future farmer groups.

- Works in the areas of cooperatives, agrarian reform, rural settlements, and small business development.

ECUADOR

Fundacion Ecuatoriana de Desarrollo (FED)
Colon 1120 y J Leon Mara
Apartado Postal 2529
Quito, Ecuador

Private, non-profit

Project Implementation — Development funding and cooperatives

- Promotes the development of urban housing and agricultural cooperatives by providing credit, training, and technical assistance.

- Has a southern branch which provides credit to small industries and businesses. Address is:
  Calle Pinchincha No. 724y Sucre
  Apartado Postal 9260
  Guayaquil, Ecuador

GUATEMALA

Guatemala Rural Reconstruction Movement
11 Calle 8-14, #43
Ciudad de Guatemala, Zona 1
Guatemala
Field Office: Jalpa

See pages 44 and 45 for complete information.

Laboratorio de Energia Solar
Estarion Experimental
Canton Chogur
Quezaltenango, Guatemala

Private, non-profit

Research & Development — Solar energy applications

- Works on such applications as solar water heaters, solar greenhouses, wind generators, methane digesters, and the use of native plants.

Instituto de Nutricion para Centro America y Panama (INCAP)
Carretera Roosevelt
Zona II
Ciudad de Guatemala

Latin American regional

Research & Development — Nutrition

- Assisted by the Pan American Health Organization, INCAP has developed a low-cost, high-protein, milk substitute product.

GUATEMALA

Solidarios - Consejo de Fundaciones Americanas de Desarrollo
6A Avenida #6-47, Apt. 4
Apartado Postal 2211
Guatemala Zona 9
Ciudad de Guatemala
Guatemala

Private, non-profit

Project Implementation — Socio-economic development

- Promotes the growth and cooperation of Latin American development foundations.

HONDURAS

Centro Cooperative Tecnico Industrial (CCTI)
Avenida La Paz 407
Apartado Postal 938
Tegucigalpa, Honduras

Quasi-governmental

Research & Development — Appropriate technology

- Performs research and development on appropriate technologies for development, including a low-cost kiln, the use of sawdust, the production of charcoal, and extracting salt water by solar energy.

Escuela Agricola Panamericana
Apartado 93
Tegucigalpa, D.C.
Honduras, C.A.

University-related

HONDURAS

Research & Development
Education & Training

Basic agriculture

- Offers courses and training in horticulture, agronomy, animal husbandry.
- Currently working with Peace Corps to develop programs in soils, fisheries, and visual aids.
- Future program areas include: appropriate technologies and rural training for campesinos.
- Publishes Ceiba, a scientific journal on agriculture in Spanish and English.

JAMAICA

Carribean Food & Nutrition Institute
P.O. Box 140
Mona
Kingston 7, Jamaica

Caribbean regional

Research & Development
Information Dissemination

Food and nutrition

- Affiliated with the Pan American Health Organization, the institute performs studies and disseminates information on food and nutrition, and publishes a newsletter/journal, CAJANUS.

Institute of Social & Economic Research
University of the West Indies
Kingston 7, Jamaica

University-related

Research & Development
Education & Training
Information Dissemination

Socio-economic development

JAMAICA

- Researches and disseminates information on Jamaican socio-economic development and the role of the woman, including a study on fertility in the West Indies.

MEXICO

Centro de Estudios Educativos (CEE)

Research & Development
Information Dissemination

Latin American educational research

- Provides news service on educational developments in Latin American countries.

- Maintains contact with major educational clearinghouse and documentation centers.

Centro Internacional de Mejoramiento de Maiz y Trigo (CIMMYT)
Apartado Postal 6-641
Mexico 6, D.F.
Mexico

Latin American regional

Research & Development
Information Dissemination

Agricultural development

- Seeking to improve corn and wheat production, CIMMYT engages in research in the evaluation of genetic resources, breeding, and testing of new grain varieties, agronomic research, developing countries' food production problems, and development of crop resistance to plant diseases.

- Trains specialists in above subjects. Uses the Peace Corps/VITA Small Farm Grain Storage manual in its maize production training course.

MEXICO

Instituto Latinoamericano de la Comunicacion Educative (ILCE)
ILCE-UNESCO-MEXICO
Apartado Postal 18862
Mexico 18, D.F.
Mexico

Private, non-profit

Education & Training
Information Dissemination

Educational communication

- Produces and distributes various audio-visual materials, including films, filmstrips, recordings and flipcharts.
- Offers courses for professionals in that field.
- Sponsors seminars and discussions on educational technology in Latin America.

NICARAGUA

Fundacion Nicaraquense de Desarrollo (FUNDE)
Colonia Mantica (Calle Colon)
Apartado Postal 2598
Managua, Nicaragua

Private, non-profit

Project Implementation

Economic development and cooperative formation

- FUNDE promotes the development of cooperatives by providing credit and technical assistance.
- Works through a Rural Education Family Center and has assisted in the development of a Center for Cooperative Training.

PARAGUAY

Fundacion Paraguaya para el Desarrollo
Trejoy Sanabria 1225 (Sanjonia)
P.O. Box 1521
Asuncion, Paraguay

Private, non-profit

Research & Development
Project Implementation

Social and economic development

- Promotes integrated development, scientific research, and educational development.

- Provides credit assistance to consumer cooperatives, both urban and rural.

- Publishes studies on various development topics.

PERU

Centro Internacional da la Papa
Apartado 5969
Lima, Peru

Private, non-profit

Research & Development
Education & Training
Information Dissemination

Potato production

- Researches all aspects of potato production.

- Sponsors seven regional research and training programs in Tuluca, Mexico; Lima, Peru; Nairobi, Kenya; Ixmir, Turkey; Karachi, Pakistan; Kathmandu, Nepal; Surveon, South Korea.

- Publishes a wide range of research materials on potato production.

PERU

International Labour Organization
Regional Office for Latin America
Apartado Postal 3638
Las Flores 295-San Isidro
Lima 27, Peru

See page 57 for complete information.

URUGUAY

Centro Interamericano de Investigacion y Documentacion Sobre Formacion Profesional (CINTERFOR) (Inter-American Center for Research & Documentation on Vocational Training)
Casilla de Correo 1761
Montevideo, Uruguay

Public, international

Research & Development
Education & Training
Information Dissemination

Vocational training

- Promotes cooperation among American vocational training institutions.
- Promotes, performs, and disseminates vocational training research studies.
- Documentation and information service compiles and catalogs bibliographies on Latin American vocational training.
- Publishes reports, studies, bibliographies, and vocational training abstracts. A catalog of CINTERFOR publications is available.

Other: Created by and responsible to the International Labor Organization (ILO).

Middle East, North Africa and the Sahel

EGYPT

Development Education
Project Implementation
Educational Training — Child health care

- Provides medical services, food, clothing and education for improvement of child health care worldwide.
- Seeks to alter conditions affecting children and families through improved child welfare services, training programs, demonstration projects, and community development projects.
- Provides day care centers, feeding programs, mother and teacher training in nutrition.
- Supports various education activities, including teacher training, vocational training, adult education and school garden projects.
- Maintains a development education program consisting of films, slide tape shows, workshops and an annual conference focussing on Third World.

Club 2/3 Inc.
5434 Henri Bourassa East
Montreal North, Quebec HIG 3S9
Canada

Project Implementation — Development of cooperatives

CANADA

- Supports growth of Third World cooperatives through funding of mini-projects and seeking out markets for cooperative products.
- Development education program to increase Canadian awareness of international development.

Cooperative Union of Canada
237 Metcalfe St.
Ottawa, Ontario K2P 1R2
Canada

Project Implementation

Credit unions and cooperatives

- Assists the development of cooperatives and credit unions overseas.
- Supports cooperative projects in the fields of housing, water supplies, food production, agricultural development, credit unions and marketing.
- Sponsors workshops in development education.

UNITED STATES

Accion International/AITEC
10-C Mt. Auburn Street
Cambridge, Massachusetts 02138

Private, non-profit

Project implementation

Latin American small business and rural development

- Provides credit and managerial assistance to existing and planned small business, in Latin American countries.
- Has published works on small business, community development and employment of women in Spanish and Portuguese.

UNITED STATES

- Operates in Brazil, Colombia, Costa Rica, Dominican Republic, Ecuador, Guatemala, Mexico, and Venezuela.

AFL-CIO (American Federation of Labor-Congress of Industrial Organizations)
815 16th Street, N.W.
Washington, D.C. 20006

Private, non-profit

Industrial Development & Management — Labor unions

- AFL-CIO contributes directly to development assistance programs oveseas and provides orientation briefings and hospitality for labor and labor-related visitors and trainees abroad.

- Corporate entities of the AFL-CIO are the African-American Labor Center (see below), the American Institute for Free Labor Development (page 102), and the Asian-American Free Labor Institute (page 106).

African-American Labor Center
345 East 46 Street, Suite 200
New York, N.Y. 10017

Private, non-profit

Construction, Housing & Planning
Cooperatives, Credit Unions & Loans
Education
Industrial Development

- Provides loans for construction of union headquarters, union-sponsored clinics and workers' education centers.

- Promotes co-ops and credit unions; particpates in training courses in cooperative and credit association techniques.

- Sponsors educational programs and vocational training to upgrade skills of employed union members, provides courses in research methods and development economics, in cooperation with local trade unions and training centers.

UNITED STATES

- Conducts union-to-union activities and provides leadership training with trade union education for union leaders at all levels.
- Provides furnishings and equipment for more effective operation of trade union programs.
- Countries of assistance: Botswana, Burundi, Cameroon, Kenya, Lesotho, Liberia, Malawi, Mali, Mauritania, Mauritius, Niger, Senegal, Seychelles, Sierra Leone, Sudan, Swaziland, Togo, Upper Volta, Zaire, Zambia.
- Publications: AALC Reporter (monthly newsletter, French and English editions); African Trade Union News (bimonthly, French and English editions); Labor in Development (monthly bulletin, French and English editions).

AFRICARE
1424 16th Street, N.W.
Washington, D.C. 20036

Private, non-profit

Research & Development	African
Project Implementation	Rural Development

- Designs, plans, implements rural development, health, water resources and agricultural projects.
- Maintains regional office in Niamey, Niger.
- Operates in The Gambia, Ethiopia, Mali, Mauritania, Niger, Senegal, and Upper Volta.

Agricultural Cooperative Development International
1430 K Street, N.W.
Washington, D.C. 20005

Private, non-profit

Project implementation	Development of cooperatives

UNITED STATES

- Promotes the development of cooperatives.
- Provides assistance in agricultural credit, banking, capital formation, marketing, processing, and farm supplies.
- Responds within a 30-day period to overseas information requests from development workers in cooperative projects.
- Operates in Colombia, Guatemala, Honduras, Paraguay, Kenya, Liberia, Tanzania, and the Philippines.

Agricultural Development Council (ADC)
630 Fifth Avenue
New York, New York 10020

Private, non-profit

Information dissemination

Agricultural and rural development in Asia

- Provides fellowships for formal study, offers seminars and workshops, and operates an Asian interregional program of educational assistance and support for Asians working in agricultural and rural development education.
- Publishes books, monographs, and reprints.
- Maintains an Asian program office:

  Agricultural Development Council
  Tanglin
  P.O. Box 84
  Singapore 10

1717 Massachusetts Avenue
Suite 501
Washington, D.C. 20036

Private, non-profit

Project implementation — World development

- Seeks to "ensure wise decisions affecting the process of the development of the poorer nations," by promoting research studies, acting as an information clearinghouse, disseminating development information through publications, meetings and seminars, and the production of materials for use by schools and religious organizations.

- Publishes a variety of books, technical monographs, and development papers.

Overseas Education Fund of the League of Women Voters
2101 L Street, N.W., Suite 916
Washington, D.C. 20037

Private, non-profit

Community Development Education — Women in development

- Major portion of its resources is directed towards helping women acquire skills needed to bring about change. Programs in the U.S. are aimed at heightening the awareness of the role women play in international development and involving Americans in international cooperation programs.

- Trains housing "promoters" in techniques of communication, group dynamics, and planning and programming.

- Trains poor women to help them make social and personal adjustments upon entering the job market.

- Conducts surveys in rural areas which focus on roles and needs of women.

- Interviews poor women to identify child care needs and designs alternative models to meet them.

UNITED STATES

- OEF is currently seeking new projects in Africa. Countries of assistance: East Asia and Pacific--Korea, Malaysia, Thailand; Latin America--Colombia, Costa Rica, Dominican Republic, El Salvador, Peru; Near East-South Asia--Sri Lanka.

- Publications: Fiscal year report; information and program publications in English and Spanish form one component of OEF's publications program. Program publications are sold at cost. Available Spanish-language publications describe how to run voluntary organizations and simplified parliamentary procedure and include a handbook for leaders of organizations. Two English-language booklets report on women in Latin America and Indonesia. OEF's publication list is available on request.

UNITED STATES

Fundraising
Project Implementation
Self-Help Community Development Projects

International development

- Recruits U.S. schools, clubs, civic and religious organizations and private citizens to sponsor self-help development projects in communities where Peace Corps Volunteers have requested financial assistance through Peace Corps Partnership Program. Funds requested for community projects usually range from $1,000 to $2,000. PCPP also channels general individual donations in any amount for community projects.

- Provides general confirmation upon request from potential sponsors about the program and a current list of projects in need of funding are sent for review and selection.

- Assists sponsors in the organization of fundraising activities.

- Drawing on appropriate technological skills and available resources, requesting communities must provide all necessary land and manual labor, as well as at least 25% of the materials for the project.

- Countries of assistance: Depending on Peace Corps Volunteer requests for assistance.

- Publications and audio-visual materials: Peace Corps Partnership Program information packet; 21-minute film describing the Partnership program available upon request; posters and slide cassette presentation available to assist project publicity or fundraising efforts; "Memorandum to Peace Corps Volunteers joining the Partnership program."

Tropical Pesticides Research Institute
P.O. Box 3024
Arusha, Tanzania

Government

Research & Development
Research Dissemination

Pest control

- Studies the biology, ecology and control strategy of various agricultural, medical and veterinary pests. Also tests and screens pesticides.

- Operates in the areas of pest control, chemicals, environment/conservation and public health.

- Maintains a library and provides consulting and laboratory services.

5. A Selected, Annotated Bibliography on Appropriate Technology

Appropriate Technology Directory of Machines, Tools, Plants, Equipments, Processes, and Industries, 1977, 280 pages, $10.00 (Appropriate Technology Development Association, India). Available from VITA. A guide to technologies and resources for locally built and adaptable technology developed in India. Includes instructions for producing tools and equipment for agriculture, crafts, metal working, and small-scale industries.

Appropriate Technology in Social Context: An Annotated Bibliography by David French, 1977, 35 pages, $2.95 (VITA). Available from VITA. This manual contains a bibliography of literature on the choice and use of technologies within the context of social realities.

Appropriate Technology Sourcebook by Ken Darrow and Rick Pam, second edition, 1976, 304 pages, $4.00 (Appropriate Technology Project, Volunteers in Asia, Inc., Box 4543, Stanford, California 94305, U.S.A.). Contains reviews, addresses, and prices of over 375 US and international publications with the emphasis on practical designs for small-scale systems using local skills and resources. Topics include alternative sources of energy, farm implements, shop tools, agriculture, low-cost housing, health care, water supply, pedal power, and the philosophy of appropriate technology. Illustrations from many of the publications are reproduced. Available to Peace Corps volunteers from ICE.

Assessing Rural Needs: A Manual for Practitioners, 1978, 130 pages, $3.95 (ACCION/AITEC). Available from VITA. A guide for surveying local needs, designed to help villagers communicate their needs to governments, and to provide information for better project planning.

Direct Use of the Sun's Energy, by Farrington Daniels, Ballantine Books, 1964, 264 pages, $1.95 (Whole Earth Truck Store, 558 Santa Cruz Avenue, Menlo Park, California 94025, U.S.A.). Clear and comprehensive information on the basic principles and possible uses of solar energy, with simple drawings (non construction plans) supplementing the text. The history of solar energy, solar radiation, solar collectors, hot water heaters, heat storage, solar cookers, agricultural drying, distillation of water, and heat engines are discussed. Available to Peace Corps

volunteers from ICE.

Economically Appropriate Technologies for Developing Countries, compiled by Marilyn Carr, IT Publications, 1976, 101 pages, $6.95. Available from VITA. A good beginning guide to intermediate technology and the choice of appropriate technologies, including information on technologies for agriculture, housing, building materials, manufacturing, and technical publications. Available from Peace Corps ICE.

Energy for Rural Development: Renewable Resources and Alternative Technologies for Developing Countries, 1976, National Academy of Sciences, 306 pages (single copies free to people in government, educational or research institutions, NAS, 2101 Constitution Avenue, Washington, D.C. 20418, U.S.A.) This manual evaluates energy technologies for their appropriateness for use in developing countries. Includes sections on direct and indirect uses of solar energy, wind energy, water power, geothermal energy, and on energy storage.

Energy Primer, Portola Institute, 1974, 200 pages (Peace Corps ICE). A comprehensive, fairly technical book about renewable forms of energy--solar, water, wind, and biofuels. The biofuels section covers biomass energy, agriculture, aquaculture, alcohol, methane, and wood. The focus is on small-scale systems which can be applied to the needs of the individual, small group, or community. More than one quarter of the book is devoted to reviews of books and hardware sources. Hundreds of illustrations and a dozen original articles outlining basic principles are used to describe the workings of solar water heaters, space heaters and dryers, waterwheels, windmills, wind generators, wood-burning heaters, alcohol stills, and methane digesters. The final section of the book focusses on the need for energy conservation and some of the problems and potentials of integrated energy systems.

Guidelines for Development of a Home Industry, Peace Corps/Ethiopia, 1976, 59 pages, $4.50. Available from VITA. Easily understandable, illustrated guidelines useful in considering marketing, production, training, and record-keeping for home industry projects. Simple instructions for some of the activities of the Ethiopia Volunteer Rehabilitation Project are also included. Available from Peace Corps ICE.

Handbook for Building Homes of Earth, 159 pages (Peace Corps ICE). This manual covers all aspects of adobe, rammed earth, and pressed block construction for homes and similar structures. Topics include: different types of soils, soil testing, soil stabilizers, building site preparation, foundations, soil preparation, making blocks, walls,

roofs and floors, and surface coatings. Numerous drawings and photographs are very helpful.

A Handbook on Appropriate Technology, Brace Research Institute and the Canadian Hunger Foundation, 1976, 280 pages, $9.00 (also available in French and Spanish; Canadian Hunger Foundation, 75 Sparks Street, Ottawa, Ontario, KIP 5A5, Canada). Various aspects of appropriate technology are presented: philosophy, 12 case studies, glossary of technical terms, catalog of tools and equipment, bibliographies, and organizations and individuals involved in appropriate technology development. Available from Peace Corps ICE.

International Directory of Appropriate Technology Resources, by Brij Mathur, VITA, 1978, 400 pages, $15.95. Available from VITA. Directory describes 250 organizations from 65 countries and includes organizations that deal with appropriate technologies in the fields of agriculture, community development, crafts, education, food processing, forestry, low-cost housing, and renewable sources of energy.

Introduction to Appropriate Technology, edited by R. J. Congdon, 1977, 305 pages, $6.95 (available from Rodale Press, Inc., or VITA, 3706 Rhode Island Avenue, Mt. Rainier, Md. 20822, U.S.A.) A collection of lectures by economists, scientists, and practitioners on appropriate technology philosophy and practice. Stresses importance of socially appropriate technologies.

Liklik Buk, the Melanesian Council of Churches, second edition, 1977, 270 pages, $5.00 (Wantok Publications, Box 1982, Baroko, Papua New Guinea). Subtitled "A Rural Development Handbook/Catalogue for Papua New Guinea," this illustrated book contains practical information on crop and animal production, food processing, village industries, energy, water supply, building and road construction, health and nutrition, arts and crafts, and animating village development; annotated lists of books, pamphlets, periodicals, organizations, and individuals are included. Especially useful for Southeast Asia and other tropical areas. Available from Peace Corps ICE.

Self-Help Construction of 1-story Buildings, VITA, 1977, 235 pages, $9.50. Designed for field workers with little or no construction experience. Assists families or communities in planning, designing and constructing one-story buildings (schools, health clinics, homes, etc.), using locally available materials. Available from Peace Corps ICE.

Small Farm Grain Storage, VITA, 1976, 560 pages, $10.00. A practical field manual covering aspects of small-scale grain storage, including plans for grain dryers and storage facilities, and techniques for controlling insects and rodents. Available from Peace Corps ICE.

Teaching Nutrition in Developing Countries, Meals for Millions Foundation, VITA, 1977, 35 pages, $2.95. Available from VITA. Includes 19 essays on aspects of nutrition education from training professionals in rural areas to using media techniques in nutrition programs. Emphasis here is on viewing nutrition from the communitiey's point of view. Includes good bibliographies. Available from Peace Corps ICE.

Village Technology Handbook, VITA, 1975, 387 pages, $9.00. (Also available in French and Spanish; VITA, 3706 Rhode Island Avenue, Mt. Rainier, Md. 20822, U.S.A.) Contains a variety of low-cost techniques and devices which can be made and used in villages. Subjects covered include developing water resources, water lifting and transport, water storage and water power, water purification, health and sanitation, agriculture, food processing and preservation, construction, home improvement, building a pottery kiln, and silk screen printing. Available from Peace Corps ICE.

Where There Is No Doctor by David Werner, 1977, 400 pages, $6.95. This book is the "bible" for rural health care in areas where professional medical help is unavailable or poor. Includes sections on home remedies to modern medicines and from family planning to childbirth. Available from Peace Corps ICE.

6. Useful Periodicals for Development Workers

ACTION UNDP

CESI
United Nations
Palais des Nations
CH-1211 Geneva 10
Switzerland

OR

UNDP/Information Division
Carnegie Building, Rm. CN-315
345 E. 46th Street
New York, New York 10017

This bi-monthly is published in association with Development Forum, which appears nine times per year. ACTION UNDP focusses on specific ongoing UNDP development projects. Development Forum provides reports, news and debates concerning the international development process. Both are published in English, French, German, Italian and Spanish.

Africa Today

The Graduate School of International Affairs
University of Denver
Denver, Colorado 80208

A quarterly review featuring in-depth analysis of political, social and economic development in or related to Africa.

AID Research and Development Abstracts (ARDA)

Technical Assistance Bureau
Editor of the ARDA
Agency for International Development
Department of State
Washington, D.C. 20523

This quarterly is devoted to research and development studies of problems related to national development. Topics include: education, public health, agriculture, science and technology, and economics.

Appropriate Technology

Intermediate Technology Publications, Ltd.
9 King Street
Covent Garden
London WC2E H8N
United Kingdom

This quarterly sponsored by ITDG includes research and development information about organizations, conferences and appropriate tools/equipment. Also descriptions, instructions, technical data and illustrations relating to latest development projects are provided.

Ceres

Unipub, Inc.
Box 443
Murray Hill Station
New York, New York 10016

F.A.O.'s illustrated global review of agricultural, economic and social developments. Published in English, French and Spanish bi-monthly.

Commercial Fish Farmer and Aquaculture News
(formerly Aquaculture Magazine)

P.O. Box 2451
Little Rock, Arkansas 72203

The bi-monthly magazine examines and reports on fish culture and fish farming, concentrating on industrial development.

Commitment

United Nations Development Programme
Information Division
Carnegie Building, Rm. CN-315
345 East 46th Street
New York, New York 10017

UNDP quarterly service bulletin is issued primarily to help non-governmental organizations in their development assistance activities.

Communique

Mr. David Hoopes
Intercultural Communication Network
4401 Fifth Avenue
Pittsburgh, Penn. 12513

The bi-monthly newsletter reports on education and training programs and research in intercultural communication.

Compost Science: Journal of Waste Recycling

Ruth Lozor
33 East Minor Street
Emmanus, Penn. 18049

This bi-monthly publication discusses alternative methods, ideas and processes involved in and concerning composting and waste recycling.

Contact

Information Division
Communications Branch
Canadian International Development Agency
122 Bank Street
Ottawa, Canada K7A OG4

A monthly newsletter covering events and news from CIDA, the government agency responsible "for the official Canadian development assistance program, and the Canadian involvement in international development."

Countryside and Small Stock Journal

Ron Grosz, Business Manager
Countryside and Small Stock Journal
Waterloo, Wisconsin 53594

A monthly review of handy hints, ideas and discussions of various aspects of homesteading, including breeding and caring for animals, garden cultivation, food preparation and storage, and illustrated "how to" articles.

Development Digest

Distributed by the AID mission in each country or by the American Embassy.

This is a quarterly journal of excerpts, summaries, and reprints of current materials on economic and social development.

Development and Education Exchange

Office of the Coordinator
FFHC/Action for Development
F.A.O.
Rome 00100, Italy

A bi-monthly on selected materials "available for use in programs of development education--part of a service to facilitate the exchange of ideas and material between those involved in the planning and operation of educational programs concerning international development issues." Published in French and English.

F.A.O. Food and Nutrition Newsletter

Editor
Nutrition Division of Food and Agriculture
F.A.O.
Via delle Terme de Caracalla
Rome 00100, Italy

A quarterly review of current information on research and new developments relating to world developments in food policy and nutrition, with particular reference to the work of F.A.O.

Finance and Development

Miss Kendall
International Monetary Fund
Publications Center
Washington, D.C. 20431

A quarterly published by IMF and World Bank in English, French, German and Spanish, with selected articles in Arabic and Portuguese. Articles address a wide range of topics dealt with in IMF and Bank operations, including financing of development projects.

ICVA News

International Council of Voluntary Agencies
17, avenue de la Paix
1202 Geneva
Switzerland

A quarterly account of "programmes of voluntary, governmental and intergovernmental agencies operating in fields of social, economic and cultural development, of assistance to refugees and migrants, and of aid in cases of natural or man-made disaster."

Industrial Education - The Magazine for Industrial Arts, Vocational-Industrial and Technical Education

CCM Professional Magazines, Inc.
22 West Putnam Avenue
Greenwich, Connecticut 06830

This monthly magazine is designed for teachers and administrators of industrial arts, vocational-industrial and technical education in shops and laboratories in junior high schools, vocational technical schools, community junior colleges and universities.

INFOTECH

Newsletter Editor
Technology and Development Institute
East-West Center
1777 East-West Road
Honolulu, Hawaii 96822

"Quarterly publication highlighting activities of the East-West Technology and Development Institute and including capsule reports on research and development projects."

International Development Review

Andrew E. Rice
Executive Secretary
Society for International Development
1346 Connecticut Avenue, N.W.
Washington, D.C. 20036

A quarterly journal composed of articles including divergent points of view on development-related issues. Subscribers must be members of the Society for International Development.

Focus - A quarterly supplement to the International Development Review, Focus is devoted to the theory and practice of technical assistance. Articles are primarily in English, but some Spanish and French articles are included.

ICIT Report

Information Center on Instructional Technology
Academy for Educational Development
1414 22nd Street, N.W.
Washington, D.C. 20037

Information Center on Instructional Technology's bi-monthly newsletter includes information on the use of media in all aspects of development communication, including health, nutrition, agriculture, etc.

INTSOY Newsletter

International Soybean Program
INTSOY Newsletter
University of Illinois at Urbana-Champaign
113 Mumford Hall
Urbana, Illinois 61801

INTSOY is a program of the Universities of Illinois and Puerto Rico-Magaguez Campus cooperating with international and national organizations to expand the use of soybeans for human food. When technical articles are included in the quarterly publication, they are written for interested generalists.

IRRI Reporter

International Rice Research Institute
P.O. Box 933
Manila, Philippines

International Rice Research Institute's quarterly newsletter focusses on various aspects of rice research.

Population Reports

Population Information Program
Department of Medical and Public Affairs
Science Communication Division
George Washington University Medical Center
2001 S Street, N.W.
Washington, D.C. 20009

Each issue of this bi-monthly report is devoted to a different family planning-related topic.

Ranger Rick's Nature Magazine

National Wildlife Federation
1412 16th Street, N.W.
Washington, D.C. 20036

RDN Bulletin - Rural Development Network

Secretariat
Overseas Liaison Committee
American Council on Education
11 Dupont Circle
Washington, D.C. 20036

RDN Bulletin briefly outlines latest activities, research and implementation, programs and publications relating to rural development assistance, occasionally focuses on a specific region. It is published four to six times a year and is available in English, French and Spanish.

RF Illustrated

The Rockefeller Foundation
1133 Avenue of the Americas
New York, New York 10036

This newspaper includes articles and photographs which explore issues concerning environment, agriculture and population in both the U.S. and developing countries; information on grants in various fields is also included.

School Shop - Industrial Technical Education

Circulation Director
School Shop
416 Longshore Drive
Ann Arbor, Michigan 48107

This monthly publication is composed of technical articles providing insight into creative school programming, projects and building. To qualify for special rate, volunteers must provide the following information to School Shop: (1) title, (2) functional level (voc. sch., sr. hs., jr. hs., etc.), (3) subjects taught (examples of qualifying subjects are drafting/design, electricity, electronics, machine shop, crafts), (4) nature of instruction (ind. arts, voc. ed., etc.), (5) name of school, (6) school address. NOTE: School Shop must be delivered to the school, not to a residence.

Small Industry Development Network

Economic Development Laboratory
Engineering Experiment Station
Georgia Institute of Technology
Atlanta, Georgia 30332

A quarterly newsletter concerned with technological and entrepreneurial aspects of small industry development in developing countries.

Soundings from Around the World: An Idea Exchange in Rural Development Communications

World Neighbors
5116 N. Portland
Oklahoma City, Oklahoma 73112

A quarterly communications newsletter dealing with idea exchange in rural development communication.

TAICH News

Editor
Technical Assistance Information Clearing House
200 Park Avenue South
New York, New York 10003

TAICH News contains agency news, program and project highlights and events, and notices of new materials relating to the planning and execution of overseas development assistance as well as information about conferences, meetings, or courses.

Tree Planter's Notes

Cooperative Forestry, U.S.D.A.
12th and Independence Avenues, S.W.
Room 3242
Washington, D.C. 20250

A monthly devoted to new developments in equipment, nursery operation, techniques and methods of planting and seeding trees, handling and packing seed-

lings, improving seedling growth, site preparation, seed collecting, processing, and useful storage procedure.

T.P.I. Reports - (Tropical Products Information)

Tropical Products Institute
56 Gray's Inn Road
London, W.C. 1
England

A monthly newsletter including tropical products information, concentrating on grain storage regarding T.P.I. research and development, training, advice and field operations.

Tropical Storage Abstracts and Tropical Stored Products Information

The Editors
Tropical Stored Products Centre
London Road
Slough SL3 SHL
Bucks, England

Tropical Storage Abstracts is a selection of recent abstracts relevant to the storage of durable agricultural produce in the tropics.

Tropical Stored Products Information is an illustrated technical publication designed specifically for tropical stored products field workers. Articles are generally related to actual field projects.

UNICEF News

U.S. Committee for UNICEF
311 East 38th Street
New York, New York 10016

This publication is printed four times a year. Many of its articles are drawn from UNICEF studies and UNICEF staff travel; all pertain to development programs.

UNIDO Newsletter

United Nations Industrial Development Organization
P.O. Box 707, A-1011
Vienna, Austria

This monthly contains information regarding current events of major economic significance in the developing countries; appropriate technologies evolved or adapted in developing countries; sources of reports on commercially adaptable technologies; news of industrial opportunities--resources sought by entrepreneurs; and a calendar of conferences, seminars, etc.

VITA News

Volunteers in Technical Assistance
3706 Rhode Island Avenue
Mr. Rainier, Maryland 20822

This quarterly newsletter featuring current and projected VITA activities in technical assistance focusses on appropriate tecnhnology.

Voluntary Action Leadership

National Center for Voluntary Action
1785 Massachusetts Avenue, N.W.
Washington, D.C. 20036

A brief compendium, published four times a year, on legislation and regulations, aids and resources, research and analysis; it also includes special reports.

War on Hunger

Publications Division
Office of Public Affairs
AID
Room 4953, State Department
Washington, D.C. 20523

A monthly AID newsletter that concentrates on field programs to combat hunger.

World Education Reports: A Journal of Developments in the Field of Funtional Education for Family Life Planning

World Education, Inc.
1414 Sixth Avenue
New York, New York 10019

This quarterly highlights World Education efforts to plan, implement, support and evaluate innovative educational programs, especially those related to literacy, food production, and family planning.

World Farming

World Farming
1014 Wyandotte Street
Kansas City, Missouri 64105

A monthly magazine on all aspects of farming.

World Neighbors in Action

World Neighbors
International Headquarters
5116 North Portland Avenue
Oklahoma City, Oklahoma 73112

A newsletter, geared to the developing countries, for field workers in community development and resources in developing countries. Published in both English and Spanish.

GPO 893-739

Since 1961 when the Peace Corps was created, more than 80,000 U.S. citizens have served as Volunteers in developing countries, living and working among the people of the Third World as colleagues and co-workers. Today 6000 PCVs are involved in programs designed to help strengthen local capacity to address such fundamental concerns as food production, water supply, energy development, nutrition and health education and reforestation.
